PIRATES FAIL TO HIT AND CUBS WIN

Kantlehner Holds Cubs to Four Scattered Hits but Loses the Game.

CHICAGO, April 24.—Sixteen thousand and half frozen Chicagoans watched Piche McConnell hold the Pirates to one hit Sunday afternoon, the Cubs winning 3 to 0.

The Cubs scored what proved to be the winning run in the sixth inning in an unusual manner. Mann was on third and Flack on first. Williams hit a foul which Schmidt caught, and then threw to second to catch Flack, Mann scoring on the throw.

The Cubs scored two more runs in the eighth on a walk, Williams's triple and a sacrifice. The score:

GOOD WORK

Proper Food Makes Marvellous Changes.

Providence is sometimes credited with directing the footsteps of so simple a way as the reading of a food advertisement.

A lady in Mo. writes, "I was compelled to retire from my school teaching because I was broken down with nervous prostration."

"I suffered agony in my back and was in a dreadfully nervous condition, irritable, with a dull, heavy headache continually, had no appetite and could scarcely digest anything. I was unable to remember what I read and was, of course, unfit for my work."

"One day, as if by providence, I read the testimonial of a lady whose symptoms were much the same as mine, and she told of how Grape-Nuts food had helped her, so I concluded to try it."

"I began with Grape-Nuts, a little fruit and a cup of Postum. I steadily improved in both body and mind. Grape-Nuts has done more for me than all the medicine I have ever taken. I am now well again and able to do anything necessary in my work."

"My mind is clear and my body stronger than ever before. 'There's a Reason.' Name given by Postum Co., Battle Creek, Mich."

"Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.—Advertisement."

In Numerous Cities for the Instruction of Their Foreign-born Population.

(SPECIAL TO THE TELEGRAM)

WASHINGTON, April 24.—In approximately 650 cities and towns located in forty-five states of the Union the public school authorities, in cooperation with the bureau of naturalization of the United States department of labor, have established evening schools for the instruction of their foreign-born population. Several municipalities, with a keen realization of the educational deficiencies of the aliens, and appreciating the advantages to be derived through their knowledge of English, have extended the period of instruction to the end of the present scholastic year. In other cities the school authorities have signified their intention of maintaining the public schools as long as there is any evidence of need on the part of the adult alien population.

Unfortunately, according to reports received by the bureau of naturalization, the public school authorities of a large majority of the cities and towns, which have engaged in this stupendous campaign for citizenship preparedness, have discontinued, or are about to discontinue, their classes for alien instruction. Various causes are assigned, but the main difficulty appears to be a lack of funds for the compensation of teachers. In order to combat this condition, patriotic public school teachers and representatives of the principal organizations in many places have volunteered their services to continue this splendid work until such time as proper appropriations may be made for the purpose.

In all of the cities and towns now co-operating with the bureau of naturalization in this great educational movement the intention is to reopen the night schools at the beginning of the fall term. Advice has been received from various other smaller places where, for one reason or another, they have as yet been unable to join in this undertaking that the public school authorities have determined to open night schools for alien instruction at the beginning of the next scholastic year. There is also contemplated in various cities a plan whereby the summer classes, which have hitherto run from July 1 to August 31, may open their doors on May 1, and extend the period of instruction to September 30.

Great results have already been accomplished, and greater are expected. The bureau of naturalization since the first of last October has sent the names of more than 165,000 candidates for citizenship and their wives to the public school authorities of the country. It has also sent personal letters to all of these to induce them to enter the public schools. It has prepared an outline course in citizenship, thousands of copies of which have been distributed to the public school teachers. It has also prepared a syllabus of the naturalization law, which it has sent out with copies of preliminary naturalization forms to aid teachers in the instruction of candidates for citizenship.

The co-operation of the public schools with the national government has come to stay, and the bureau of naturalization believes that this movement will go far toward solving the problem of the loyalty of every sixth resident of the country, there being nearly 17,000,000 foreign-born residents in the United States, of whom approximately 4,000,000 are citizens.
